## 1 Namespace Index

### 1.1 Packages

Here are the packages with brief descriptions (if available):

|  |   |
|--|---|
| <a href="#">pm9</a>                              | 5 |
| <a href="#">pm9.trackingserver</a>               | 5 |
| <a href="#">pm9.trackingserver.config</a>        | 5 |
| <a href="#">pm9.trackingserver.constants</a>     | 6 |
| <a href="#">pm9.trackingserver.controller</a>    | 6 |
| <a href="#">pm9.trackingserver.dao</a>           | 6 |
| <a href="#">pm9.trackingserver.dao.impl</a>      | 6 |
| <a href="#">pm9.trackingserver.entities</a>      | 6 |
| <a href="#">pm9.trackingserver.rest</a>          | 6 |
| <a href="#">pm9.trackingserver.rest.request</a>  | 7 |
| <a href="#">pm9.trackingserver.rest.response</a> | 7 |
| <a href="#">pm9.trackingserver.service</a>       | 7 |
| <a href="#">pm9.trackingserver.service.impl</a>  | 7 |
| <a href="#">pm9.trackingserver.validator</a>     | 7 |

## 2 Hierarchical Index

### 2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

|   |    |
|---|----|
| <a href="#">pm9.trackingserver.controller.AuthController</a>                    | 8  |
| <a href="#">pm9.trackingserver.dao.BaseDao</a>                                  | 10 |
| <a href="#">pm9.trackingserver.dao.impl.BaseDaoImpl</a>                         | 12 |
| <a href="#">pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest</a> | 19 |
| <a href="#">pm9.trackingserver.rest.request.DeviceRegisterRequest</a>           | 21 |
| <a href="#">pm9.trackingserver.rest.request.DeviceUnregisterRequest</a>         | 22 |
| <a href="#">pm9.trackingserver.constants.EnumResponse</a>                       | 23 |

|   |    |
|---|----|
| pm9.trackingserver.rest.response.GenericResponse          | 26 |
| pm9.trackingserver.rest.request.GetDeviceLocationsRequest | 27 |
| pm9.trackingserver.controller.MainController              | 28 |
| pm9.trackingserver.service.MainControllerService          | 31 |
| pm9.trackingserver.service.impl.MainControllerServiceImpl | 32 |
| pm9.trackingserver.service.OrganizationService            | 40 |
| pm9.trackingserver.service.impl.OrganizationServiceImpl   | 41 |
| pm9.trackingserver.config.RedisConfig                     | 43 |
| pm9.trackingserver.dao.RedisRepository                    | 45 |
| pm9.trackingserver.dao.impl.RedisRepositoryImpl           | 47 |
| pm9.trackingserver.service.RedisService                   | 52 |
| pm9.trackingserver.service.impl.RedisServiceImpl          | 54 |
| pm9.trackingserver.service.SecurityService                | 61 |
| pm9.trackingserver.service.impl.SecurityServiceImpl       | 62 |
| CrudRepository  |    |
| pm9.trackingserver.dao.DeviceDao                          | 16 |
| pm9.trackingserver.dao.OrganizationDao                    | 39 |
| Serializable  |    |
| pm9.trackingserver.entities.Device                        | 14 |
| pm9.trackingserver.entities.Organization                  | 35 |
| pm9.trackingserver.rest.response.DeviceLocationResponse   | 17 |
| SpringBootServletInitializer                              |    |
| pm9.trackingserver.TrackingserverApplication              | 64 |
| UserDetailsService  |    |
| pm9.trackingserver.service.impl.UserDetailsServiceImpl    | 66 |
| Validator   |    |
| pm9.trackingserver.validator.UserValidator                | 68 |
| WebSecurityConfigurerAdapter                              |    |
| pm9.trackingserver.config.SecurityConfig                  | 58 |

## 3 Class Index

### 3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

|   |    |
|---|----|
| <a href="#">pm9.trackingserver.controller.AuthController</a>                    |    |
| It a controller which processes all security related things                     | 8  |
| <a href="#">pm9.trackingserver.dao.BaseDao</a>                                  | 10 |
| <a href="#">pm9.trackingserver.dao.impl.BaseDaoImpl</a>                         |    |
| Implementation of <a href="#">BaseDao</a>                                       | 12 |
| <a href="#">pm9.trackingserver.entities.Device</a>                              |    |
| Device entity object  | 14 |
| <a href="#">pm9.trackingserver.dao.DeviceDao</a>                                | 16 |
| <a href="#">pm9.trackingserver.rest.response.DeviceLocationResponse</a>         | 17 |
| <a href="#">pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest</a> | 19 |
| <a href="#">pm9.trackingserver.rest.request.DeviceRegisterRequest</a>           | 21 |
| <a href="#">pm9.trackingserver.rest.request.DeviceUnregisterRequest</a>         | 22 |
| <a href="#">pm9.trackingserver.constants.EnumResponse</a>                       |    |
| Enum of common responses returned by the API                                    | 23 |
| <a href="#">pm9.trackingserver.rest.response.GenericResponse</a>                | 26 |
| <a href="#">pm9.trackingserver.rest.request.GetDeviceLocationsRequest</a>       | 27 |
| <a href="#">pm9.trackingserver.controller.MainController</a>                    |    |
| Contains all methods to process requests at /api/*                              | 28 |
| <a href="#">pm9.trackingserver.service.MainControllerService</a>                | 31 |
| <a href="#">pm9.trackingserver.service.impl.MainControllerServiceImpl</a>       |    |
| Implementation of <a href="#">MainControllerService</a>                         | 32 |
| <a href="#">pm9.trackingserver.entities.Organization</a>                        |    |
| Organization entity object  | 35 |
| <a href="#">pm9.trackingserver.dao.OrganizationDao</a>                          | 39 |
| <a href="#">pm9.trackingserver.service.OrganizationService</a>                  | 40 |
| <a href="#">pm9.trackingserver.service.impl.OrganizationServiceImpl</a>         |    |
| Implementation of <a href="#">OrganizationService</a>                           | 41 |
| <a href="#">pm9.trackingserver.config.RedisConfig</a>                           |    |
| Contains all connection configuration related to Redis server                   | 43 |
| <a href="#">pm9.trackingserver.dao.RedisRepository</a>                          | 45 |
| <a href="#">pm9.trackingserver.dao.impl.RedisRepositoryImpl</a>                 |    |
| Implementation of <a href="#">RedisRepository</a>                               | 47 |
| <a href="#">pm9.trackingserver.service.RedisService</a>                         | 52 |
| <a href="#">pm9.trackingserver.service.impl.RedisServiceImpl</a>                |    |
| Implementation of <a href="#">RedisService</a>                                  | 54 |
| <a href="#">pm9.trackingserver.config.SecurityConfig</a>                        |    |
| Contains all configuration related to security and authority                    | 58 |

|  |    |
|--|----|
| <a href="#">pm9.trackingserver.service.SecurityService</a>   | 61 |
| <a href="#">pm9.trackingserver.service.impl.SecurityServiceImpl</a><br>Implementation of <a href="#">SecurityService</a> | 62 |
| <a href="#">pm9.trackingserver.TrackingserverApplication</a><br>Spring boot application which is run                     | 64 |
| <a href="#">pm9.trackingserver.service.impl.UserDetailsServiceImpl</a>   | 66 |
| <a href="#">pm9.trackingserver.validator.UserValidator</a><br>Used to validate user when they register                   | 68 |

## 4 Namespace Documentation

### 4.1 Package pm9

#### Packages

- package [trackingserver](#)

### 4.2 Package pm9.trackingserver

#### Packages

- package [config](#)
- package [constants](#)
- package [controller](#)
- package [dao](#)
- package [entities](#)
- package [rest](#)
- package [service](#)
- package [validator](#)

#### Classes

- class [TrackingserverApplication](#)
- class **TrackingserverApplicationTests**

### 4.3 Package pm9.trackingserver.config

#### Classes

- class [RedisConfig](#)
- class [SecurityConfig](#)

#### 4.4 Package pm9.trackingserver.constants

##### Classes

- enum [EnumResponse](#)

#### 4.5 Package pm9.trackingserver.controller

##### Classes

- class [AuthController](#)
- class [MainController](#)

#### 4.6 Package pm9.trackingserver.dao

##### Packages

- package [impl](#)

##### Classes

- interface [BaseDao](#)
- interface [DeviceDao](#)
- interface [OrganizationDao](#)
- interface [RedisRepository](#)

#### 4.7 Package pm9.trackingserver.dao.impl

##### Classes

- class [BaseDaoImpl](#)
- class [RedisRepositoryImpl](#)

#### 4.8 Package pm9.trackingserver.entities

##### Classes

- class [Device](#)
- class [Organization](#)

#### 4.9 Package pm9.trackingserver.rest

##### Packages

- package [request](#)
- package [response](#)

#### 4.10 Package pm9.trackingserver.rest.request

##### Classes

- class [DeviceLocationSubmissionRequest](#)
- class [DeviceRegisterRequest](#)
- class [DeviceUnregisterRequest](#)
- class [GetDeviceLocationsRequest](#)

#### 4.11 Package pm9.trackingserver.rest.response

##### Classes

- class [DeviceLocationResponse](#)
- class [GenericResponse](#)

#### 4.12 Package pm9.trackingserver.service

##### Packages

- package [impl](#)

##### Classes

- interface [MainControllerService](#)
- interface [OrganizationService](#)
- interface [RedisService](#)
- interface [SecurityService](#)

#### 4.13 Package pm9.trackingserver.service.impl

##### Classes

- class [MainControllerServiceImpl](#)
- class [OrganizationServiceImpl](#)
- class [RedisServiceImpl](#)
- class [SecurityServiceImpl](#)
- class [UserDetailsServiceImpl](#)

#### 4.14 Package pm9.trackingserver.validator

##### Classes

- class [UserValidator](#)

## 5 Class Documentation

### 5.1 pm9.trackingserver.controller.AuthController Class Reference

Collaboration diagram for pm9.trackingserver.controller.AuthController:

#### Public Member Functions

- String [registration](#) (Model model)
- String [registration](#) (@ModelAttribute("userForm") Organization userForm, BindingResult bindingResult)
- String [login](#) (Model model, String error, String logout)
- String [welcome](#) (Model model)

#### Private Attributes

- [UserValidator](#) [userValidator](#)
- [OrganizationService](#) [organizationService](#)
- [SecurityService](#) [securityService](#)

#### 5.1.1 Detailed Description

It a controller which processes all security related things.

It contains all methods related to logging in and signing up.

#### 5.1.2 Member Function Documentation

##### 5.1.2.1 login()

```
String pm9.trackingserver.controller.AuthController.login (
    Model model,
    String error,
    String logout )
```

Processes model when you sign in.

**Parameters**

|               |                                       |
|---------------|---------------------------------------|
| <i>model</i>  | which needs to be passed to the page. |
| <i>error</i>  | Contains error message.               |
| <i>logout</i> | Option to logout.                     |

**Returns**

model when you sign in.

**5.1.2.2 registration()** [1/2]

```
String pm9.trackingserver.controller.AuthController.registration (
    Model model )
```

Processes model before signing up.

**Parameters**

|              |                                       |
|--------------|---------------------------------------|
| <i>model</i> | which needs to be passed to the page. |
|--------------|---------------------------------------|

**Returns**

registration page

**5.1.2.3 registration()** [2/2]

```
String pm9.trackingserver.controller.AuthController.registration (
    @ModelAttribute("userForm") Organization userForm,
    BindingResult bindingResult )
```

Processes model after sign up form has been field.

**Parameters**

|                      |   |
|----------------------|---|
| <i>userForm</i>      | Details submitted during registration.  |
| <i>bindingResult</i> | Contains results from previous mapping. |

**Returns**

'welcome' page if registration is successful, else 'registration' page is returned.

#### 5.1.2.4 welcome()

```
String pm9.trackingserver.controller.AuthController.welcome (
    Model model )
```

Returns welcome page when you log in or when you come to the website.

##### Parameters

|              |                                       |
|--------------|---------------------------------------|
| <i>model</i> | which needs to be passed to the page. |
|--------------|---------------------------------------|

##### Returns

'welcome' page

### 5.1.3 Member Data Documentation

#### 5.1.3.1 organizationService

```
OrganizationService pm9.trackingserver.controller.AuthController.organizationService [private]
```

#### 5.1.3.2 securityService

```
SecurityService pm9.trackingserver.controller.AuthController.securityService [private]
```

#### 5.1.3.3 userValidator

```
UserValidator pm9.trackingserver.controller.AuthController.userValidator [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/controller/AuthController.java

## 5.2 pm9.trackingserver.dao.BaseDao Interface Reference

Inheritance diagram for pm9.trackingserver.dao.BaseDao:

### Public Member Functions

- Session [getSession](#) ()
- Object [save](#) (Object entity)
- void [saveOrUpdate](#) (Object entity)
- void [delete](#) (Object object)
- < T > List< T > [getAll](#) (Class< T > class\_)

#### 5.2.1 Member Function Documentation

##### 5.2.1.1 delete()

```
void pm9.trackingserver.dao.BaseDao.delete (
    Object object )
```

Implemented in [pm9.trackingserver.dao.impl.BaseDaoImpl](#).

##### 5.2.1.2 getAll()

```
<T> List<T> pm9.trackingserver.dao.BaseDao.getAll (
    Class< T > class_ )
```

##### 5.2.1.3 getSession()

```
Session pm9.trackingserver.dao.BaseDao.getSession ( )
```

Implemented in [pm9.trackingserver.dao.impl.BaseDaoImpl](#).

##### 5.2.1.4 save()

```
Object pm9.trackingserver.dao.BaseDao.save (
    Object entity )
```

Implemented in [pm9.trackingserver.dao.impl.BaseDaoImpl](#).

##### 5.2.1.5 saveOrUpdate()

```
void pm9.trackingserver.dao.BaseDao.saveOrUpdate (
    Object entity )
```

Implemented in [pm9.trackingserver.dao.impl.BaseDaoImpl](#).

The documentation for this interface was generated from the following file:

- src/main/java/pm9/trackingserver/dao/BaseDao.java

### 5.3 pm9.trackingserver.dao.impl.BaseDaoImpl Class Reference

Inheritance diagram for pm9.trackingserver.dao.impl.BaseDaoImpl:

Collaboration diagram for pm9.trackingserver.dao.impl.BaseDaoImpl:

#### Public Member Functions

- Session [getSession](#) ()
- Object [save](#) (Object entity)
- void [saveOrUpdate](#) (Object entity)
- void [delete](#) (Object object)

#### Private Attributes

- final Logger [logger](#) = LoggerFactory.getLogger(getClass())

#### 5.3.1 Detailed Description

Implementation of [BaseDao](#).

It provides common methods to interact with the MySQL database. There is currently no need for this. We are using CRUDRepository to perform database operations, and not this class.

### 5.3.2 Member Function Documentation

#### 5.3.2.1 delete()

```
void pm9.trackingserver.dao.impl.BaseDaoImpl.delete (
    Object object )
```

Implements [pm9.trackingserver.dao.BaseDao](#).

#### 5.3.2.2 getSession()

```
Session pm9.trackingserver.dao.impl.BaseDaoImpl.getSession ( )
```

Implements [pm9.trackingserver.dao.BaseDao](#).

#### 5.3.2.3 save()

```
Object pm9.trackingserver.dao.impl.BaseDaoImpl.save (
    Object entity )
```

Implements [pm9.trackingserver.dao.BaseDao](#).

#### 5.3.2.4 saveOrUpdate()

```
void pm9.trackingserver.dao.impl.BaseDaoImpl.saveOrUpdate (
    Object entity )
```

Implements [pm9.trackingserver.dao.BaseDao](#).

### 5.3.3 Member Data Documentation

#### 5.3.3.1 logger

```
final Logger pm9.trackingserver.dao.impl.BaseDaoImpl.logger = LoggerFactory.getLogger(get↔
Class()) [private]
```

The documentation for this class was generated from the following file:

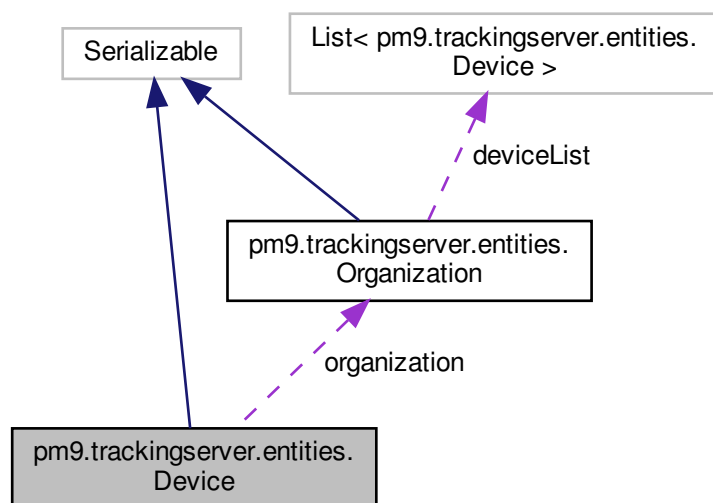

- src/main/java/pm9/trackingserver/dao/impl/BaseDaoImpl.java

## 5.4 pm9.trackingserver.entities.Device Class Reference

Inheritance diagram for pm9.trackingserver.entities.Device:

Collaboration diagram for pm9.trackingserver.entities.Device:

### Public Member Functions

- Long [getId](#) ()
- void [setId](#) (Long [id](#))
- String [getDeviceId](#) ()
- void [setDeviceId](#) (String [deviceId](#))
- [Organization](#) [getOrganization](#) ()
- void [setOrganization](#) ([Organization](#) [organization](#))

### Private Attributes

- Long [id](#)
- String [deviceId](#)
- [Organization](#) [organization](#)

### 5.4.1 Detailed Description

[Device](#) entity object.

This file is used for ORM.

### 5.4.2 Member Function Documentation

#### 5.4.2.1 `getDeviceId()`

```
String pm9.trackingserver.entities.Device.getDeviceId ( )
```

#### 5.4.2.2 `getId()`

```
Long pm9.trackingserver.entities.Device.getId ( )
```

#### 5.4.2.3 `getOrganization()`

```
Organization pm9.trackingserver.entities.Device.getOrganization ( )
```

#### 5.4.2.4 `setDeviceId()`

```
void pm9.trackingserver.entities.Device.setDeviceId (
    String deviceId )
```

#### 5.4.2.5 `setId()`

```
void pm9.trackingserver.entities.Device.setId (
    Long id )
```

#### 5.4.2.6 setOrganization()

```
void pm9.trackingserver.entities.Device.setOrganization (  
    Organization organization )
```

### 5.4.3 Member Data Documentation

#### 5.4.3.1 deviceId

```
String pm9.trackingserver.entities.Device.deviceId [private]
```

#### 5.4.3.2 id

```
Long pm9.trackingserver.entities.Device.id [private]
```

#### 5.4.3.3 organization

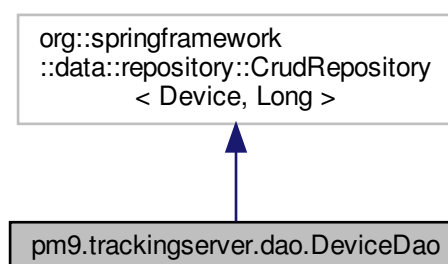

```
Organization pm9.trackingserver.entities.Device.organization [private]
```

The documentation for this class was generated from the following file:

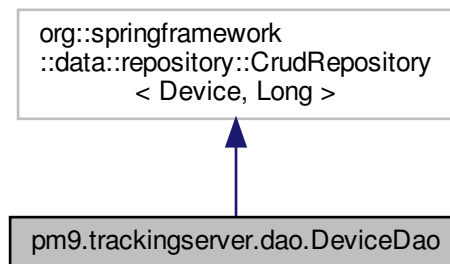

- src/main/java/pm9/trackingserver/entities/Device.java

## 5.5 pm9.trackingserver.dao.DeviceDao Interface Reference

Inheritance diagram for pm9.trackingserver.dao.DeviceDao:

Collaboration diagram for pm9.trackingserver.dao.DeviceDao:

#### Public Member Functions

- [Device findById](#) (String deviceId)

#### 5.5.1 Member Function Documentation

##### 5.5.1.1 findById()

```
Device pm9.trackingserver.dao.DeviceDao.findById (
    String deviceId )
```

The documentation for this interface was generated from the following file:

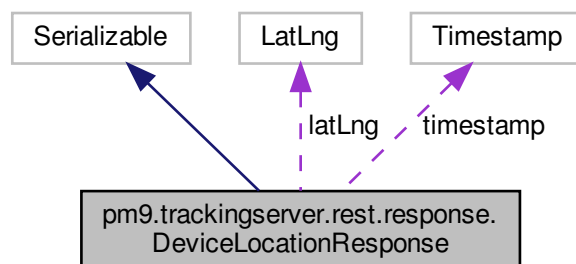

- `src/main/java/pm9/trackingserver/dao/DeviceDao.java`

## 5.6 pm9.trackingserver.rest.response.DeviceLocationResponse Class Reference

Inheritance diagram for pm9.trackingserver.rest.response.DeviceLocationResponse:

Collaboration diagram for pm9.trackingserver.rest.response.DeviceLocationResponse:

#### Public Member Functions

- LatLng [getLatLng](#) ()
- void [setLatLng](#) (LatLng [latLng](#))
- Timestamp [getTimestamp](#) ()
- void [setTimestamp](#) (Timestamp [timestamp](#))

#### Private Attributes

- LatLng [latLng](#)
- Timestamp [timestamp](#)

### 5.6.1 Member Function Documentation

#### 5.6.1.1 getLatLng()

```
LatLng pm9.trackingserver.rest.response.DeviceLocationResponse.getLatLng ( )
```

#### 5.6.1.2 getTimestamp()

```
Timestamp pm9.trackingserver.rest.response.DeviceLocationResponse.getTimestamp ( )
```

#### 5.6.1.3 setLatLng()

```
void pm9.trackingserver.rest.response.DeviceLocationResponse.setLatLng (
    LatLng latLng )
```

#### 5.6.1.4 setTimestamp()

```
void pm9.trackingserver.rest.response.DeviceLocationResponse.setTimestamp (
    Timestamp timestamp )
```

### 5.6.2 Member Data Documentation

#### 5.6.2.1 latLng

```
LatLng pm9.trackingserver.rest.response.DeviceLocationResponse.latLng [private]
```

#### 5.6.2.2 timestamp

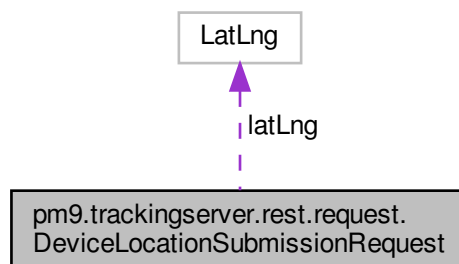

```
Timestamp pm9.trackingserver.rest.response.DeviceLocationResponse.timestamp [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/rest/response/DeviceLocationResponse.java

## 5.7 pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest Class Reference

Collaboration diagram for pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest:

#### Public Member Functions

- String [getApiKey](#) ()
- void [setApiKey](#) (String [apiKey](#))
- LatLng [getLatLng](#) ()
- void [setLatLng](#) (LatLng [latLng](#))
- String [getDeviceId](#) ()
- void [setDeviceId](#) (String [deviceId](#))

## Private Attributes

- String `apiKey`
- String `deviceId`
- LatLng `latLng`

## 5.7.1 Member Function Documentation

### 5.7.1.1 `getApiKey()`

```
String pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.getApiKey ( )
```

### 5.7.1.2 `getDeviceId()`

```
String pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.getDeviceId ( )
```

### 5.7.1.3 `getLatLng()`

```
LatLng pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.getLatLng ( )
```

### 5.7.1.4 `setApiKey()`

```
void pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.setApiKey (
    String apiKey )
```

### 5.7.1.5 `setDeviceId()`

```
void pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.setDeviceId (
    String deviceId )
```

### 5.7.1.6 `setLatLng()`

```
void pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.setLatLng (
    LatLng latLng )
```

## 5.7.2 Member Data Documentation

### 5.7.2.1 apiKey

```
String pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.apiKey [private]
```

### 5.7.2.2 deviceId

```
String pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.deviceId [private]
```

### 5.7.2.3 latLng

```
LatLng pm9.trackingserver.rest.request.DeviceLocationSubmissionRequest.latLng [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/rest/request/DeviceLocationSubmissionRequest.java

## 5.8 pm9.trackingserver.rest.request.DeviceRegisterRequest Class Reference

### Public Member Functions

- String [getApiKey](#) ()
- void [setApiKey](#) (String [apiKey](#))
- String [getDeviceId](#) ()
- void [setDeviceId](#) (String [deviceId](#))

### Private Attributes

- String [apiKey](#)
- String [deviceId](#)

### 5.8.1 Member Function Documentation

#### 5.8.1.1 getApiKey()

```
String pm9.trackingserver.rest.request.DeviceRegisterRequest.getApiKey ( )
```

#### 5.8.1.2 getDeviceId()

```
String pm9.trackingserver.rest.request.DeviceRegisterRequest.getDeviceId ( )
```

### 5.8.1.3 setApiKey()

```
void pm9.trackingserver.rest.request.DeviceRegisterRequest.setApiKey (
    String apiKey )
```

### 5.8.1.4 setDeviceId()

```
void pm9.trackingserver.rest.request.DeviceRegisterRequest.setDeviceId (
    String deviceId )
```

## 5.8.2 Member Data Documentation

### 5.8.2.1 apiKey

```
String pm9.trackingserver.rest.request.DeviceRegisterRequest.apiKey [private]
```

### 5.8.2.2 deviceId

```
String pm9.trackingserver.rest.request.DeviceRegisterRequest.deviceId [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/rest/request/DeviceRegisterRequest.java

## 5.9 pm9.trackingserver.rest.request.DeviceUnregisterRequest Class Reference

### Public Member Functions

- String [getDeviceId](#) ()
- void [setDeviceId](#) (String [deviceId](#))

### Private Attributes

- String [deviceId](#)

### 5.9.1 Member Function Documentation

#### 5.9.1.1 getDeviceId()

```
String pm9.trackingserver.rest.request.DeviceUnregisterRequest.getDeviceId ( )
```

#### 5.9.1.2 setDeviceId()

```
void pm9.trackingserver.rest.request.DeviceUnregisterRequest.setDeviceId (
    String deviceId )
```

### 5.9.2 Member Data Documentation

#### 5.9.2.1 deviceId

```
String pm9.trackingserver.rest.request.DeviceUnregisterRequest.deviceId [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/rest/request/DeviceUnregisterRequest.java

## 5.10 pm9.trackingserver.constants.EnumResponse Enum Reference

### Public Member Functions

- [EnumResponse](#) (Long [id](#), String [message](#))
- Long [getId](#) ()
- void [setId](#) (Long [id](#))
- String [getMessage](#) ()
- void [setMessage](#) (String [message](#))

### Static Public Member Functions

- static [GenericResponse](#) [getGenericResponse](#) ([EnumResponse](#) [enumResponse](#))

### Public Attributes

- [WORKING](#) =(100I, "Working")
- [SUCCESS](#) =(200I, "Success")
- [WRONG\\_API\\_KEY](#) =(500I, "Wrong API KEY")
- [DEVICE\\_REGISTER\\_FAILURE](#) =(510I, "Device not registered")
- [DEVICE\\_NOT\\_FOUND](#) =(520I, "Device not found")
- [DEVICE\\_UNREGISTER\\_FAILURE](#) =(530I, "Device not unregistered")
- [DEVICE\\_ALREADY\\_REGISTERED](#) =(540I, "Device already registered")

## Private Attributes

- Long [id](#)
- String [message](#)

### 5.10.1 Detailed Description

Enum of common responses returned by the API.

### 5.10.2 Constructor & Destructor Documentation

#### 5.10.2.1 EnumResponse()

```
pm9.trackingserver.constants.EnumResponse.EnumResponse (
    Long id,
    String message )
```

### 5.10.3 Member Function Documentation

#### 5.10.3.1 getGenericResponse()

```
static GenericResponse pm9.trackingserver.constants.EnumResponse.getGenericResponse (
    EnumResponse enumResponse ) [static]
```

This function returns a GenericResponse which contains the information of [EnumResponse](#) object.

#### Parameters

|                     |   |
|---------------------|---|
| <i>enumResponse</i> | <a href="#">EnumResponse</a> which needs to returned. |
|---------------------|---|

#### Returns

Packs [EnumResponse](#) as GenericResponse.

#### 5.10.3.2 getId()

```
Long pm9.trackingserver.constants.EnumResponse.getId ( )
```

### 5.10.3.3 getMessage()

```
String pm9.trackingserver.constants.EnumResponse.getMessage ( )
```

### 5.10.3.4 setId()

```
void pm9.trackingserver.constants.EnumResponse.setId (
    Long id )
```

### 5.10.3.5 setMessage()

```
void pm9.trackingserver.constants.EnumResponse.setMessage (
    String message )
```

## 5.10.4 Member Data Documentation

### 5.10.4.1 DEVICE\_ALREADY\_REGISTERED

```
pm9.trackingserver.constants.EnumResponse.DEVICE_ALREADY_REGISTERED =(5401, "Device already
registered")
```

### 5.10.4.2 DEVICE\_NOT\_FOUND

```
pm9.trackingserver.constants.EnumResponse.DEVICE_NOT_FOUND =(5201, "Device not found")
```

### 5.10.4.3 DEVICE\_REGISTER\_FAILURE

```
pm9.trackingserver.constants.EnumResponse.DEVICE_REGISTER_FAILURE =(5101, "Device not registered")
```

### 5.10.4.4 DEVICE\_UNREGISTER\_FAILURE

```
pm9.trackingserver.constants.EnumResponse.DEVICE_UNREGISTER_FAILURE =(5301, "Device not unregistered")
```

### 5.10.4.5 id

```
Long pm9.trackingserver.constants.EnumResponse.id [private]
```

Used to identify the response.

#### 5.10.4.6 message

```
String pm9.trackingserver.constants.EnumResponse.message [private]
```

Contains details of the response.

#### 5.10.4.7 SUCCESS

```
pm9.trackingserver.constants.EnumResponse.SUCCESS =(2001, "Success")
```

#### 5.10.4.8 WORKING

```
pm9.trackingserver.constants.EnumResponse.WORKING =(1001, "Working")
```

#### 5.10.4.9 WRONG\_API\_KEY

```
pm9.trackingserver.constants.EnumResponse.WRONG_API_KEY =(5001, "Wrong API KEY")
```

The documentation for this enum was generated from the following file:

- src/main/java/pm9/trackingserver/constants/EnumResponse.java

### 5.11 pm9.trackingserver.rest.response.GenericResponse Class Reference

#### Public Member Functions

- Long [getStatus](#) ()
- void [setStatus](#) (Long [status](#))
- String [getMessage](#) ()
- void [setMessage](#) (String [message](#))

#### Private Attributes

- Long [status](#)
- String [message](#)

#### 5.11.1 Member Function Documentation

##### 5.11.1.1 getMessage()

```
String pm9.trackingserver.rest.response.GenericResponse.getMessage ( )
```

#### 5.11.1.2 getStatus()

```
Long pm9.trackingserver.rest.response.GenericResponse.getStatus ( )
```

#### 5.11.1.3 setMessage()

```
void pm9.trackingserver.rest.response.GenericResponse.setMessage (
    String message )
```

#### 5.11.1.4 setStatus()

```
void pm9.trackingserver.rest.response.GenericResponse.setStatus (
    Long status )
```

### 5.11.2 Member Data Documentation

#### 5.11.2.1 message

```
String pm9.trackingserver.rest.response.GenericResponse.message [private]
```

#### 5.11.2.2 status

```
Long pm9.trackingserver.rest.response.GenericResponse.status [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/rest/response/GenericResponse.java

## 5.12 pm9.trackingserver.rest.request.GetDeviceLocationsRequest Class Reference

### Public Member Functions

- String [getApiKey](#) ()
- void [setApiKey](#) (String [apiKey](#))

### Private Attributes

- String [apiKey](#)

### 5.12.1 Member Function Documentation

#### 5.12.1.1 `getApiKey()`

```
String pm9.trackingserver.rest.request.GetDeviceLocationsRequest.getApiKey ( )
```

#### 5.12.1.2 `setApiKey()`

```
void pm9.trackingserver.rest.request.GetDeviceLocationsRequest.setApiKey (
    String apiKey )
```

### 5.12.2 Member Data Documentation

#### 5.12.2.1 `apiKey`

```
String pm9.trackingserver.rest.request.GetDeviceLocationsRequest.apiKey [private]
```

The documentation for this class was generated from the following file:

- `src/main/java/pm9/trackingserver/rest/request/GetDeviceLocationsRequest.java`

## 5.13 `pm9.trackingserver.controller.MainController` Class Reference

Collaboration diagram for `pm9.trackingserver.controller.MainController`:

### Public Member Functions

- `GenericResponse submitLocation` (@RequestBody `DeviceLocationSubmissionRequest` deviceLocation↵ SubmissionRequest)
- `Map< String, DeviceLocationResponse > getDeviceLocations` (@RequestBody `GetDeviceLocations↵ Request` getDeviceLocationsRequest)
- `GenericResponse registerDevice` (@RequestBody `DeviceRegisterRequest` deviceRegisterRequest)
- `GenericResponse unregisterDevice` (@RequestBody `DeviceUnregisterRequest` deviceUnregisterRequest)
- `GenericResponse status` ()

#### Private Attributes

- [RedisService](#) `redisService`
- [MainControllerService](#) `mainControllerService`

#### Static Private Attributes

- static final [Logger](#) `logger` = `LoggerFactory.getLogger(MainController.class)`

#### 5.13.1 Detailed Description

Contains all methods to process requests at `/api/*`.

It is a rest controller. It get JSON requests and returns JSON responses.

#### 5.13.2 Member Function Documentation

##### 5.13.2.1 `getDeviceLocations()`

```
Map<String, DeviceLocationResponse> pm9.trackingserver.controller.MainController.getDeviceLocations (
    @RequestBody GetDeviceLocationsRequest getDeviceLocationsRequest )
```

Processes POST requests at `/getDeviceLocations`.

#### Parameters

|  |   |
|--|---|
| <code>getDeviceLocationsRequest</code> | Request packet to get device locations. |
|--|---|

#### Returns

map of devices and their locations along with their timestamps.

##### 5.13.2.2 `registerDevice()`

```
GenericResponse pm9.trackingserver.controller.MainController.registerDevice (
    @RequestBody DeviceRegisterRequest deviceRegisterRequest )
```

Processes POST requests at `/registerDevice`.

#### Parameters

|                                    |                                    |
|------------------------------------|------------------------------------|
| <code>deviceRegisterRequest</code> | Request packet to register device. |
|------------------------------------|------------------------------------|

**Returns**

'Success' if the device was unregistered successfully else return the error message.

**5.13.2.3 status()**

```
GenericResponse pm9.trackingserver.controller.MainController.status ( )
```

Returns status of the API, whether it is working or not.

**Returns**

'Working' if the API is online.

**5.13.2.4 submitLocation()**

```
GenericResponse pm9.trackingserver.controller.MainController.submitLocation (
    @RequestBody DeviceLocationSubmissionRequest deviceLocationSubmissionRequest )
```

Processes POST requests at /submitLocation.

**Parameters**

|  |   |
|--|---|
| <i>deviceLocationSubmissionRequest</i> | Request packet to submit device location. |
|--|---|

**Returns****5.13.2.5 unregisterDevice()**

```
GenericResponse pm9.trackingserver.controller.MainController.unregisterDevice (
    @RequestBody DeviceUnregisterRequest deviceUnregisterRequest )
```

Processes POST requests at /unregisterDevice.

**Parameters**

|                                |                                      |
|--------------------------------|--------------------------------------|
| <i>deviceUnregisterRequest</i> | Request packet to unregister device. |
|--------------------------------|--------------------------------------|

**Returns**

'Success' if the device was unregistered successfully else return the error message.

### 5.13.3 Member Data Documentation

#### 5.13.3.1 logger

```
final Logger pm9.trackingserver.controller.MainController.logger = LoggerFactory.getLogger(MainController.class) [static], [private]
```

#### 5.13.3.2 mainControllerService

```
MainControllerService pm9.trackingserver.controller.MainController.mainControllerService [private]
```

#### 5.13.3.3 redisService

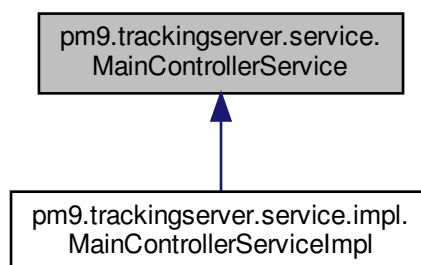

```
RedisService pm9.trackingserver.controller.MainController.redisService [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/controller/MainController.java

## 5.14 pm9.trackingserver.service.MainControllerService Interface Reference

Inheritance diagram for pm9.trackingserver.service.MainControllerService:

### Public Member Functions

- [GenericResponse registerDevice](#) ([DeviceRegisterRequest](#) deviceRegisterRequest)
- [GenericResponse unregisterDevice](#) ([DeviceUnregisterRequest](#) deviceUnregisterRequest)
- [GenericResponse submitLocation](#) ([DeviceLocationSubmissionRequest](#) deviceLocationSubmissionRequest)

### 5.14.1 Member Function Documentation

#### 5.14.1.1 registerDevice()

```
GenericResponse pm9.trackingserver.service.MainControllerService.registerDevice (
    DeviceRegisterRequest deviceRegisterRequest )
```

Implemented in [pm9.trackingserver.service.impl.MainControllerServiceImpl](#).

#### 5.14.1.2 submitLocation()

```
GenericResponse pm9.trackingserver.service.MainControllerService.submitLocation (
    DeviceLocationSubmissionRequest deviceLocationSubmissionRequest )
```

Implemented in [pm9.trackingserver.service.impl.MainControllerServiceImpl](#).

#### 5.14.1.3 unregisterDevice()

```
GenericResponse pm9.trackingserver.service.MainControllerService.unregisterDevice (
    DeviceUnregisterRequest deviceUnregisterRequest )
```

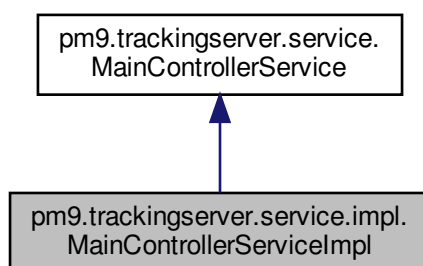

Implemented in [pm9.trackingserver.service.impl.MainControllerServiceImpl](#).

The documentation for this interface was generated from the following file:

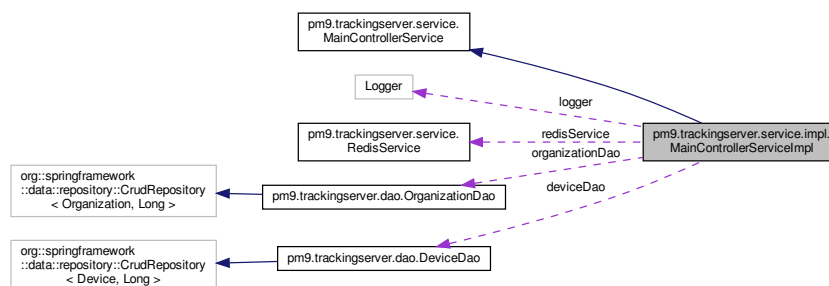

- [src/main/java/pm9/trackingserver/service/MainControllerService.java](#)

## 5.15 pm9.trackingserver.service.impl.MainControllerServiceImpl Class Reference

Inheritance diagram for [pm9.trackingserver.service.impl.MainControllerServiceImpl](#):

Collaboration diagram for pm9.trackingserver.service.impl.MainControllerServiceImpl:

### Public Member Functions

- [GenericResponse](#) [registerDevice](#) ([DeviceRegisterRequest](#) deviceRegisterRequest)
- [GenericResponse](#) [unregisterDevice](#) ([DeviceUnregisterRequest](#) deviceUnregisterRequest)
- [GenericResponse](#) [submitLocation](#) ([DeviceLocationSubmissionRequest](#) deviceLocationSubmissionRequest)

### Private Attributes

- [DeviceDao](#) deviceDao
- [OrganizationDao](#) organizationDao
- [RedisService](#) redisService

### Static Private Attributes

- static final [Logger](#) [logger](#) = [LoggerFactory.getLogger](#)(MainControllerServiceImpl.class)

#### 5.15.1 Detailed Description

Implementation of [MainControllerService](#).

Provides service methods for MainController.

#### 5.15.2 Member Function Documentation

##### 5.15.2.1 registerDevice()

```
GenericResponse pm9.trackingserver.service.impl.MainControllerServiceImpl.registerDevice (
    DeviceRegisterRequest deviceRegisterRequest )
```

Used to register a new device on the tracking server.

**Parameters**

|                              |                                    |
|------------------------------|------------------------------------|
| <i>deviceRegisterRequest</i> | Request packet to register device. |
|------------------------------|------------------------------------|

**Returns**

EnumResponse as GenericResponse.

Implements [pm9.trackingserver.service.MainControllerService](#).

**5.15.2.2 submitLocation()**

```
GenericResponse pm9.trackingserver.service.impl.MainControllerServiceImpl.submitLocation (
    DeviceLocationSubmissionRequest deviceLocationSubmissionRequest )
```

Used to by a device to submit its location.

**Parameters**

|  |   |
|--|---|
| <i>deviceLocationSubmissionRequest</i> | Request packet to submit device location. |
|--|---|

**Returns**

EnumResponse as GenericResponse.

Implements [pm9.trackingserver.service.MainControllerService](#).

**5.15.2.3 unregisterDevice()**

```
GenericResponse pm9.trackingserver.service.impl.MainControllerServiceImpl.unregisterDevice (
    DeviceUnregisterRequest deviceUnregisterRequest )
```

Used to unregister a device from the tracking server.

**Parameters**

|                                |                                      |
|--------------------------------|--------------------------------------|
| <i>deviceUnregisterRequest</i> | Request packet to unregister device. |
|--------------------------------|--------------------------------------|

**Returns**

EnumResponse as GenericResponse.

Implements [pm9.trackingserver.service.MainControllerService](#).

**5.15.3 Member Data Documentation**

#### 5.15.3.1 deviceDao

```
DeviceDao pm9.trackingserver.service.impl.MainControllerServiceImpl.deviceDao [private]
```

#### 5.15.3.2 logger

```
final Logger pm9.trackingserver.service.impl.MainControllerServiceImpl.logger = LoggerFactory.↵  
getLogger(MainControllerServiceImpl.class) [static], [private]
```

#### 5.15.3.3 organizationDao

```
OrganizationDao pm9.trackingserver.service.impl.MainControllerServiceImpl.organizationDao  
[private]
```

#### 5.15.3.4 redisService

```
RedisService pm9.trackingserver.service.impl.MainControllerServiceImpl.redisService [private]
```

The documentation for this class was generated from the following file:

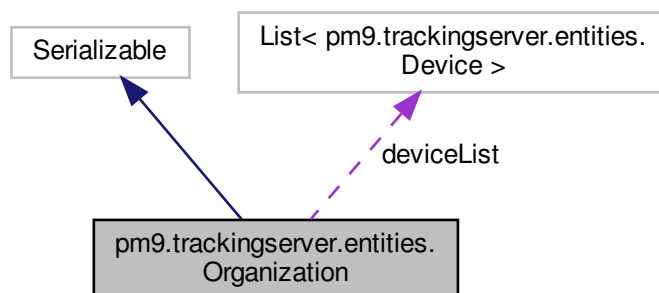

- src/main/java/pm9/trackingserver/service/impl/MainControllerServiceImpl.java

## 5.16 pm9.trackingserver.entities.Organization Class Reference

#### Private Attributes

- Long [id](#)
- String [name](#)
- String [password](#)
- String [passwordConfirm](#)
- String [apiKey](#)
- List< [Device](#) > [deviceList](#)

#### 5.16.1 Detailed Description

[Organization](#) entity object.

This file is used for ORM.

#### 5.16.2 Member Function Documentation

#### 5.16.2.1 getApiKey()

```
String pm9.trackingserver.entities.Organization.getApiKey ( )
```

#### 5.16.2.2 getDeviceList()

```
List<Device> pm9.trackingserver.entities.Organization.getDeviceList ( )
```

#### 5.16.2.3 getId()

```
Long pm9.trackingserver.entities.Organization.getId ( )
```

#### 5.16.2.4 getName()

```
String pm9.trackingserver.entities.Organization.getName ( )
```

#### 5.16.2.5 getPassword()

```
String pm9.trackingserver.entities.Organization.getPassword ( )
```

#### 5.16.2.6 getPasswordConfirm()

```
String pm9.trackingserver.entities.Organization.getPasswordConfirm ( )
```

#### 5.16.2.7 setApiKey()

```
void pm9.trackingserver.entities.Organization.setApiKey (
    String apiKey )
```

#### 5.16.2.8 setDeviceList()

```
void pm9.trackingserver.entities.Organization.setDeviceList (
    List< Device > deviceList )
```

#### 5.16.2.9 setId()

```
void pm9.trackingserver.entities.Organization.setId (
    Long id )
```

#### 5.16.2.10 setName()

```
void pm9.trackingserver.entities.Organization.setName (
    String name )
```

#### 5.16.2.11 setPassword()

```
void pm9.trackingserver.entities.Organization.setPassword (
    String password )
```

#### 5.16.2.12 setPasswordConfirm()

```
void pm9.trackingserver.entities.Organization.setPasswordConfirm (
    String passwordConfirm )
```

### 5.16.3 Member Data Documentation

#### 5.16.3.1 apiKey

```
String pm9.trackingserver.entities.Organization.apiKey [private]
```

#### 5.16.3.2 deviceList

```
List<Device> pm9.trackingserver.entities.Organization.deviceList [private]
```

#### 5.16.3.3 id

```
Long pm9.trackingserver.entities.Organization.id [private]
```

#### 5.16.3.4 name

```
String pm9.trackingserver.entities.Organization.name [private]
```

## 5.16.3.5 password

```
String pm9.trackingserver.entities.Organization.password [private]
```

## 5.16.3.6 passwordConfirm

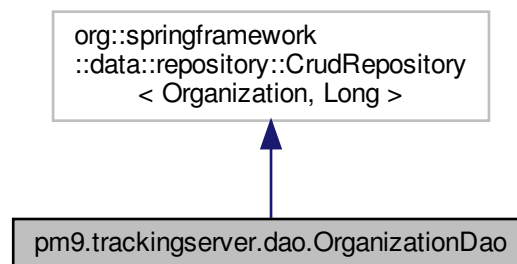

```
String pm9.trackingserver.entities.Organization.passwordConfirm [private]
```

The documentation for this class was generated from the following file:

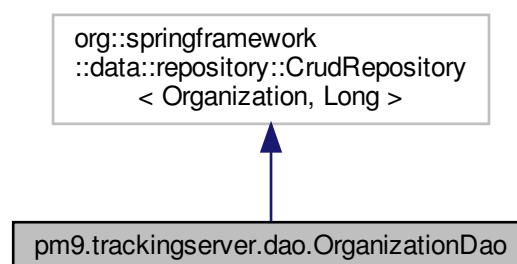

- src/main/java/pm9/trackingserver/entities/Organization.java

## 5.17 pm9.trackingserver.dao.OrganizationDao Interface Reference

Inheritance diagram for pm9.trackingserver.dao.OrganizationDao:

Collaboration diagram for pm9.trackingserver.dao.OrganizationDao:

## Public Member Functions

- [Organization findByApiKey](#) (String apiKey)
- [Organization findByName](#) (String name)

### 5.17.1 Member Function Documentation

#### 5.17.1.1 findByApiKey()

```
Organization pm9.trackingserver.dao.OrganizationDao.findByApiKey (  
    String apiKey )
```

#### 5.17.1.2 findByName()

```
Organization pm9.trackingserver.dao.OrganizationDao.findByName (  
    String name )
```

The documentation for this interface was generated from the following file:

- src/main/java/pm9/trackingserver/dao/OrganizationDao.java

## 5.18 pm9.trackingserver.service.OrganizationService Interface Reference

Inheritance diagram for pm9.trackingserver.service.OrganizationService:

## Public Member Functions

- [Organization findByName](#) (String name)
- void [createOrganization](#) ([Organization](#) organization)
- [Organization findByApiKey](#) (String apiKey)

### 5.18.1 Member Function Documentation

#### 5.18.1.1 createOrganization()

```
void pm9.trackingserver.service.OrganizationService.createOrganization (
    Organization organization )
```

Implemented in [pm9.trackingserver.service.impl.OrganizationServiceImpl](#).

#### 5.18.1.2 findByApiKey()

```
Organization pm9.trackingserver.service.OrganizationService.findByApiKey (
    String apiKey )
```

Implemented in [pm9.trackingserver.service.impl.OrganizationServiceImpl](#).

#### 5.18.1.3 findByName()

```
Organization pm9.trackingserver.service.OrganizationService.findByName (
    String name )
```

Implemented in [pm9.trackingserver.service.impl.OrganizationServiceImpl](#).

The documentation for this interface was generated from the following file:

- src/main/java/pm9/trackingserver/service/OrganizationService.java

### 5.19 pm9.trackingserver.service.impl.OrganizationServiceImpl Class Reference

Inheritance diagram for pm9.trackingserver.service.impl.OrganizationServiceImpl:

Collaboration diagram for pm9.trackingserver.service.impl.OrganizationServiceImpl:

### Public Member Functions

- [Organization](#) [findByName](#) (String name)
- void [createOrganization](#) ([Organization](#) organization)
- [Organization](#) [findByApiKey](#) (String apiKey)

### Private Attributes

- [OrganizationDao](#) [organizationDao](#)
- [RedisService](#) [redisService](#)
- BCRYPTPasswordEncoder [bCryptPasswordEncoder](#)

#### 5.19.1 Detailed Description

Implementation of [OrganizationService](#).

Provides services related to Organization.

#### 5.19.2 Member Function Documentation

##### 5.19.2.1 createOrganization()

```
void pm9.trackingserver.service.impl.OrganizationServiceImpl.createOrganization (
    Organization organization )
```

Implements [pm9.trackingserver.service.OrganizationService](#).

##### 5.19.2.2 findByApiKey()

```
Organization pm9.trackingserver.service.impl.OrganizationServiceImpl.findByApiKey (
    String apiKey )
```

Implements [pm9.trackingserver.service.OrganizationService](#).

### 5.19.2.3 findByName()

```
Organization pm9.trackingserver.service.impl.OrganizationServiceImpl.findByName (
    String name )
```

Implements [pm9.trackingserver.service.OrganizationService](#).

## 5.19.3 Member Data Documentation

### 5.19.3.1 bCryptPasswordEncoder

```
BCryptPasswordEncoder pm9.trackingserver.service.impl.OrganizationServiceImpl.bCryptPasswordEncoder [private]
```

### 5.19.3.2 organizationDao

```
OrganizationDao pm9.trackingserver.service.impl.OrganizationServiceImpl.organizationDao [private]
```

### 5.19.3.3 redisService

```
RedisService pm9.trackingserver.service.impl.OrganizationServiceImpl.redisService [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/service/impl/OrganizationServiceImpl.java

## 5.20 pm9.trackingserver.config.RedisConfig Class Reference

### Public Member Functions

- JedisConnectionFactory [jedisConnectionFactory](#) ()
- RedisTemplate< String, Object > [redisTemplate](#) (JedisConnectionFactory [jedisConnectionFactory](#))

### Private Attributes

- String [hostName](#)
- String [password](#)
- int [port](#)

### 5.20.1 Detailed Description

Contains all connection configuration related to Redis server.

## 5.20.2 Member Function Documentation

### 5.20.2.1 jedisConnectionFactory()

```
JedisConnectionFactory pm9.trackingserver.config.RedisConfig.jedisConnectionFactory ( )
```

This connection factory can be used to create an instance of RedisTemplate.

Jedis is a Redis client.

#### Returns

JedisConnectionFactory bean

### 5.20.2.2 redisTemplate()

```
RedisTemplate<String, Object> pm9.trackingserver.config.RedisConfig.redisTemplate (
    JedisConnectionFactory jedisConnectionFactory )
```

RedisTemplate bean is used to perform Redis operations.

#### Parameters

|                               |  |
|-------------------------------|--|
| <i>jedisConnectionFactory</i> | It specifies the jedisConnectionFactory. |
|-------------------------------|--|

#### Returns

RedisTemplate<String, Object> bean

## 5.20.3 Member Data Documentation

### 5.20.3.1 hostName

```
String pm9.trackingserver.config.RedisConfig.hostName [private]
```

### 5.20.3.2 password

```
String pm9.trackingserver.config.RedisConfig.password [private]
```

## 5.20.3.3 port

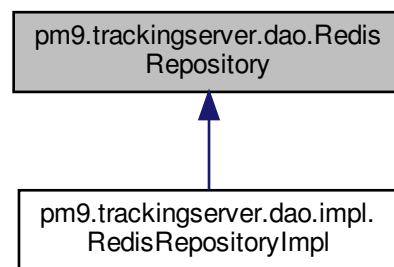

```
int pm9.trackingserver.config.RedisConfig.port [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/config/RedisConfig.java

## 5.21 pm9.trackingserver.dao.RedisRepository Interface Reference

Inheritance diagram for pm9.trackingserver.dao.RedisRepository:

## Public Member Functions

- void [saveDeviceLocation](#) (String apiKey, String deviceId, LatLng latLng)
- Map< String, [DeviceLocationResponse](#) > [getAllDeviceLocations](#) (String apiKey)
- void [loadOrganizationCache](#) ()
- [Organization](#) [getOrganizationByApiKey](#) (String apiKey)
- void [removeDevice](#) ([Device](#) device)
- [Organization](#) [updateOrganization](#) ([Organization](#) organization)
- void [insertOrganization](#) ([Organization](#) organization)
- void [insertDevice](#) ([Device](#) device)

## 5.21.1 Member Function Documentation

## 5.21.1.1 getAllDeviceLocations()

```
Map<String, DeviceLocationResponse> pm9.trackingserver.dao.RedisRepository.getAllDeviceLocations (
    String apiKey )
```

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

#### 5.21.1.2 `getOrganizationByApiKey()`

```
Organization pm9.trackingserver.dao.RedisRepository.getOrganizationByApiKey (
    String apiKey )
```

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

#### 5.21.1.3 `insertDevice()`

```
void pm9.trackingserver.dao.RedisRepository.insertDevice (
    Device device )
```

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

#### 5.21.1.4 `insertOrganization()`

```
void pm9.trackingserver.dao.RedisRepository.insertOrganization (
    Organization organization )
```

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

#### 5.21.1.5 `loadOrganizationCache()`

```
void pm9.trackingserver.dao.RedisRepository.loadOrganizationCache ( )
```

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

#### 5.21.1.6 `removeDevice()`

```
void pm9.trackingserver.dao.RedisRepository.removeDevice (
    Device device )
```

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

#### 5.21.1.7 `saveDeviceLocation()`

```
void pm9.trackingserver.dao.RedisRepository.saveDeviceLocation (
    String apiKey,
    String deviceId,
    LatLng latLng )
```

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

## 5.21.1.8 updateOrganization()

```
Organization pm9.trackingserver.dao.RedisRepository.updateOrganization (
    Organization organization )
```

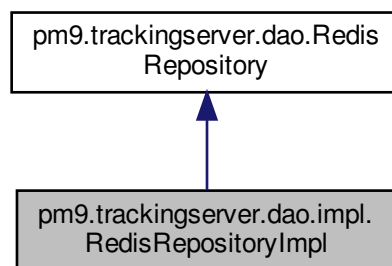

Implemented in [pm9.trackingserver.dao.impl.RedisRepositoryImpl](#).

The documentation for this interface was generated from the following file:

- src/main/java/pm9/trackingserver/dao/RedisRepository.java

## 5.22 pm9.trackingserver.dao.impl.RedisRepositoryImpl Class Reference

Inheritance diagram for pm9.trackingserver.dao.impl.RedisRepositoryImpl:

Collaboration diagram for pm9.trackingserver.dao.impl.RedisRepositoryImpl:

## Public Member Functions

- void [saveDeviceLocation](#) (String apiKey, String deviceId, LatLng latLng)
- Map< String, [DeviceLocationResponse](#) > [getAllDeviceLocations](#) (String apiKey)
- void [loadOrganizationCache](#) ()
- [Organization](#) [getOrganizationByApiKey](#) (String apiKey)
- void [removeDevice](#) ([Device](#) device)
- [Organization](#) [updateOrganization](#) ([Organization](#) organization)
- void [insertOrganization](#) ([Organization](#) organization)
- void [insertDevice](#) ([Device](#) device)

### Private Member Functions

- HashOperations [getOpsForHash](#) ()

### Private Attributes

- int [expiry\\_seconds](#)
- boolean [expire](#)
- RedisTemplate [redisTemplate](#)
- [OrganizationDao](#) [organizationDao](#)

### Static Private Attributes

- static final Logger [logger](#) = LoggerFactory.getLogger(MainControllerServiceImpl.class)

## 5.22.1 Detailed Description

Implementation of [RedisRepository](#).

This class has all the methods to interact with Redis repository.

## 5.22.2 Member Function Documentation

### 5.22.2.1 getAllDeviceLocations()

```
Map<String, DeviceLocationResponse> pm9.trackingserver.dao.impl.RedisRepositoryImpl.getAll↵
DeviceLocations (
    String apiKey )
```

Returns device locations of a particular organization.

#### Parameters

|               |   |
|---------------|---|
| <i>apiKey</i> | String based on which organization is identified. |
|---------------|---|

#### Returns

Map<String, DeviceLocationResponse> where key is the device name.

Implements [pm9.trackingserver.dao.RedisRepository](#).

### 5.22.2.2 getOpsForHash()

```
HashOperations pm9.trackingserver.dao.impl.RedisRepositoryImpl.getOpsForHash ( ) [private]
```

Returns HashOperations object which allows us to put and get objects from different caches.

**Returns**

HashOperations from the redisTemplate.

**5.22.2.3 getOrganizationByApiKey()**

```
Organization pm9.trackingserver.dao.impl.RedisRepositoryImpl.getOrganizationByApiKey (
    String apiKey )
```

Gets organization instance from 'organization' cache.

**Parameters**

|               |                                     |
|---------------|-------------------------------------|
| <i>apiKey</i> | Used to find Organization instance. |
|---------------|-------------------------------------|

**Returns**

Organization instance.

Implements [pm9.trackingserver.dao.RedisRepository](#).

**5.22.2.4 insertDevice()**

```
void pm9.trackingserver.dao.impl.RedisRepositoryImpl.insertDevice (
    Device device )
```

Inserts device into the 'organization' cache using organization's API as key.

**Parameters**

|               |   |
|---------------|---|
| <i>device</i> | The Device object which needs to be cached. |
|---------------|---|

Implements [pm9.trackingserver.dao.RedisRepository](#).

**5.22.2.5 insertOrganization()**

```
void pm9.trackingserver.dao.impl.RedisRepositoryImpl.insertOrganization (
    Organization organization )
```

Inserts the organization instance in 'organization' cache.

**Parameters**

|                     |   |
|---------------------|---|
| <i>organization</i> | Organization instance which needs to be inserted. |
|---------------------|---|

Implements [pm9.trackingserver.dao.RedisRepository](#).

#### 5.22.2.6 loadOrganizationCache()

```
void pm9.trackingserver.dao.impl.RedisRepositoryImpl.loadOrganizationCache ( )
```

Load 'organization' cache when the server is started.

All Organization instances are loaded in the cache.

Implements [pm9.trackingserver.dao.RedisRepository](#).

#### 5.22.2.7 removeDevice()

```
void pm9.trackingserver.dao.impl.RedisRepositoryImpl.removeDevice (
    Device device )
```

Removes the device instance from 'organization' cache.

##### Parameters

|               |  |
|---------------|--|
| <i>device</i> | Device instance which needs to be deleted. |
|---------------|--|

Implements [pm9.trackingserver.dao.RedisRepository](#).

#### 5.22.2.8 saveDeviceLocation()

```
void pm9.trackingserver.dao.impl.RedisRepositoryImpl.saveDeviceLocation (
    String apiKey,
    String deviceId,
    LatLng latLng )
```

Saves device location.

##### Parameters

|                 |  |
|-----------------|--|
| <i>apiKey</i>   |  |
| <i>deviceId</i> |  |
| <i>latLng</i>   |  |

Implements [pm9.trackingserver.dao.RedisRepository](#).

#### 5.22.2.9 updateOrganization()

```
Organization pm9.trackingserver.dao.impl.RedisRepositoryImpl.updateOrganization (
    Organization organization )
```

Updates the organization instance in 'organization' cache.

##### Parameters

|                     |  |
|---------------------|--|
| <i>organization</i> | Organization instance which needs to be updated. |
|---------------------|--|

##### Returns

Required Organization instance.

Implements [pm9.trackingserver.dao.RedisRepository](#).

### 5.22.3 Member Data Documentation

#### 5.22.3.1 expire

```
boolean pm9.trackingserver.dao.impl.RedisRepositoryImpl.expire [private]
```

#### 5.22.3.2 expiry\_seconds

```
int pm9.trackingserver.dao.impl.RedisRepositoryImpl.expiry_seconds [private]
```

#### 5.22.3.3 logger

```
final Logger pm9.trackingserver.dao.impl.RedisRepositoryImpl.logger = LoggerFactory.get←
Logger(MainControllerServiceImpl.class) [static], [private]
```

#### 5.22.3.4 organizationDao

```
OrganizationDao pm9.trackingserver.dao.impl.RedisRepositoryImpl.organizationDao [private]
```

#### 5.22.3.5 redisTemplate

```
RedisTemplate pm9.trackingserver.dao.impl.RedisRepositoryImpl.redisTemplate [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/dao/impl/RedisRepositoryImpl.java

## 5.23 pm9.trackingserver.service.RedisService Interface Reference

Inheritance diagram for pm9.trackingserver.service.RedisService:

### Public Member Functions

- `Map< String, DeviceLocationResponse > getAllDeviceLocations (String apiKey)`
- `void saveDeviceLocation (String apiKey, String deviceId, LatLng latLng)`
- `Organization getOrganizationByApiKey (String apiKey)`
- `void removeDevice (Device device)`
- `Organization updateOrganization (Organization organization)`
- `void insertOrganization (Organization organization)`
- `void insertDevice (Device device)`
- `void initCache ()`

### 5.23.1 Member Function Documentation

#### 5.23.1.1 getAllDeviceLocations()

```

Map<String, DeviceLocationResponse> pm9.trackingserver.service.RedisService.getAllDeviceLocations (
    String apiKey )
  
```

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

#### 5.23.1.2 getOrganizationByApiKey()

```

Organization pm9.trackingserver.service.RedisService.getOrganizationByApiKey (
    String apiKey )
  
```

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

#### 5.23.1.3 initCache()

```
void pm9.trackingserver.service.RedisService.initCache ( )
```

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

#### 5.23.1.4 insertDevice()

```
void pm9.trackingserver.service.RedisService.insertDevice (
    Device device )
```

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

#### 5.23.1.5 insertOrganization()

```
void pm9.trackingserver.service.RedisService.insertOrganization (
    Organization organization )
```

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

#### 5.23.1.6 removeDevice()

```
void pm9.trackingserver.service.RedisService.removeDevice (
    Device device )
```

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

#### 5.23.1.7 saveDeviceLocation()

```
void pm9.trackingserver.service.RedisService.saveDeviceLocation (
    String apiKey,
    String deviceId,
    LatLng latLng )
```

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

#### 5.23.1.8 updateOrganization()

```
Organization pm9.trackingserver.service.RedisService.updateOrganization (
    Organization organization )
```

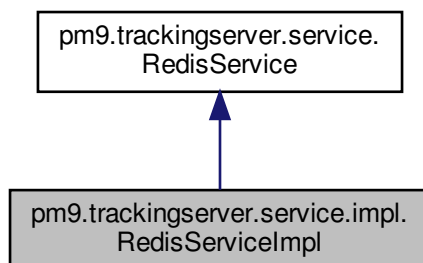

Implemented in [pm9.trackingserver.service.impl.RedisServiceImpl](#).

The documentation for this interface was generated from the following file:

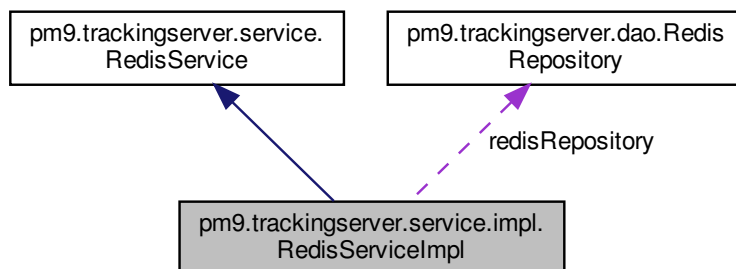

- `src/main/java/pm9/trackingserver/service/RedisService.java`

## 5.24 pm9.trackingserver.service.impl.RedisServiceImpl Class Reference

Inheritance diagram for pm9.trackingserver.service.impl.RedisServiceImpl:

Collaboration diagram for pm9.trackingserver.service.impl.RedisServiceImpl:

### Public Member Functions

- Map< String, [DeviceLocationResponse](#) > [getAllDeviceLocations](#) (String apiKey)
- void [saveDeviceLocation](#) (String apiKey, String deviceId, LatLng latLng)
- [Organization](#) [getOrganizationByApiKey](#) (String apiKey)
- void [removeDevice](#) ([Device](#) device)
- [Organization](#) [updateOrganization](#) ([Organization](#) organization)
- void [insertOrganization](#) ([Organization](#) organization)
- void [insertDevice](#) ([Device](#) device)
- void [initCache](#) ()

### Private Attributes

- [RedisRepository](#) [redisRepository](#)
- int [keyExpirySeconds](#)
- boolean [expireFlag](#)

### 5.24.1 Detailed Description

Implementation of [RedisService](#).

Provides services related to Redis repository.

### 5.24.2 Member Function Documentation

#### 5.24.2.1 getAllDeviceLocations()

```
Map<String, DeviceLocationResponse> pm9.trackingserver.service.impl.RedisServiceImpl.getAllDeviceLocations (
    String apiKey )
```

Returns device locations of a particular organization.

##### Parameters

|               |   |
|---------------|---|
| <i>apiKey</i> | String based on which organization is identified. |
|---------------|---|

##### Returns

Map<String, DeviceLocationResponse> where key is the device name.

Implements [pm9.trackingserver.service.RedisService](#).

#### 5.24.2.2 getOrganizationByApiKey()

```
Organization pm9.trackingserver.service.impl.RedisServiceImpl.getOrganizationByApiKey (
    String apiKey )
```

Finds organization by API key.

##### Parameters

|               |   |
|---------------|---|
| <i>apiKey</i> | Based on this Organization is identified. |
|---------------|---|

##### Returns

Required Organization instance.

Implements [pm9.trackingserver.service.RedisService](#).

#### 5.24.2.3 initCache()

```
void pm9.trackingserver.service.impl.RedisServiceImpl.initCache ( )
```

Service method to load 'organization' cache when the server is started.

All Organization instances are loaded in the cache.

Implements [pm9.trackingserver.service.RedisService](#).

#### 5.24.2.4 insertDevice()

```
void pm9.trackingserver.service.impl.RedisServiceImpl.insertDevice (
    Device device )
```

Inserts device into the 'organization' cache using organization's API as key.

##### Parameters

|               |   |
|---------------|---|
| <i>device</i> | The Device object which needs to be cached. |
|---------------|---|

Implements [pm9.trackingserver.service.RedisService](#).

#### 5.24.2.5 insertOrganization()

```
void pm9.trackingserver.service.impl.RedisServiceImpl.insertOrganization (
    Organization organization )
```

Inserts the organization instance in 'organization' cache.

##### Parameters

|                     |   |
|---------------------|---|
| <i>organization</i> | Organization instance which needs to be inserted. |
|---------------------|---|

Implements [pm9.trackingserver.service.RedisService](#).

#### 5.24.2.6 removeDevice()

```
void pm9.trackingserver.service.impl.RedisServiceImpl.removeDevice (
    Device device )
```

Removes device from the Redis repository.

##### Parameters

|               |                                     |
|---------------|-------------------------------------|
| <i>device</i> | Instance which needs to be removed. |
|---------------|-------------------------------------|

Implements [pm9.trackingserver.service.RedisService](#).

#### 5.24.2.7 saveDeviceLocation()

```
void pm9.trackingserver.service.impl.RedisServiceImpl.saveDeviceLocation (
    String apiKey,
    String deviceId,
    LatLng latLng )
```

Used to save a device location when it is submitted.

##### Parameters

|                 |   |
|-----------------|---|
| <i>apiKey</i>   | Based on this Organization is identified. |
| <i>deviceId</i> | Based on this Device is identified.       |
| <i>latLng</i>   | Location of the device.                   |

Implements [pm9.trackingserver.service.RedisService](#).

#### 5.24.2.8 updateOrganization()

```
Organization pm9.trackingserver.service.impl.RedisServiceImpl.updateOrganization (
    Organization organization )
```

Updates the organization instance in 'organization' cache.

##### Parameters

|                     |  |
|---------------------|--|
| <i>organization</i> | Organization instance which needs to be updated. |
|---------------------|--|

##### Returns

Required Organization instance.

Implements [pm9.trackingserver.service.RedisService](#).

### 5.24.3 Member Data Documentation

#### 5.24.3.1 expireFlag

```
boolean pm9.trackingserver.service.impl.RedisServiceImpl.expireFlag [private]
```

### 5.24.3.2 keyExpirySeconds

```
int pm9.trackingserver.service.impl.RedisServiceImpl.keyExpirySeconds [private]
```

### 5.24.3.3 redisRepository

```
RedisRepository pm9.trackingserver.service.impl.RedisServiceImpl.redisRepository [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/service/impl/RedisServiceImpl.java

## 5.25 pm9.trackingserver.config.SecurityConfig Class Reference

Inheritance diagram for pm9.trackingserver.config.SecurityConfig:

Collaboration diagram for pm9.trackingserver.config.SecurityConfig:

### Public Member Functions

- BCryptPasswordEncoder [bCryptPasswordEncoder](#) ()
- AuthenticationManager [customAuthenticationManager](#) () throws Exception
- void [configureGlobal](#) (AuthenticationManagerBuilder auth) throws Exception

### Protected Member Functions

- void [configure](#) (HttpSecurity http) throws Exception

### Private Attributes

- UserDetailsService [userDetailsService](#)

#### 5.25.1 Detailed Description

Contains all configuration related to security and authority.

#### 5.25.2 Member Function Documentation

##### 5.25.2.1 bCryptPasswordEncoder()

```
BCryptPasswordEncoder pm9.trackingserver.config.SecurityConfig.bCryptPasswordEncoder ( )
```

It is used to hash passwords.

#### Returns

BCryptPasswordEncoder java bean.

##### 5.25.2.2 configure()

```
void pm9.trackingserver.config.SecurityConfig.configure (
    HttpSecurity http ) throws Exception [protected]
```

It filters requests based on the user and url path.

It is called automatically by Spring.

#### Parameters

|             |  |
|-------------|--|
| <i>http</i> | It allows configuring web based security for specific http requests. |
|-------------|--|

**Exceptions**

|                  |  |
|------------------|--|
| <i>Exception</i> |  |
|------------------|--|

**5.25.2.3 configureGlobal()**

```
void pm9.trackingserver.config.SecurityConfig.configureGlobal (
    AuthenticationManagerBuilder auth ) throws Exception
```

Used to configure global AuthenticationManagerBuilder.

**Parameters**

|             |   |
|-------------|---|
| <i>auth</i> | allows for easily building in memory authentication, LDAP authentication, JDBC based authentication |
|-------------|---|

**Exceptions**

|                  |  |
|------------------|--|
| <i>Exception</i> |  |
|------------------|--|

**5.25.2.4 customAuthenticationManager()**

```
AuthenticationManager pm9.trackingserver.config.SecurityConfig.customAuthenticationManager ( )
throws Exception
```

This is just the vanilla flavor AuthenticationManager.

You can define a custom AuthenticationManager.

**Returns**

AuthenticationManager Default Spring authentication manager.

**Exceptions**

|                  |  |
|------------------|--|
| <i>Exception</i> |  |
|------------------|--|

**5.25.3 Member Data Documentation****5.25.3.1 userDetailsService**

```
UserDetailsService pm9.trackingserver.config.SecurityConfig.userDetailsService [private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/config/SecurityConfig.java

## 5.26 pm9.trackingserver.service.SecurityService Interface Reference

Inheritance diagram for pm9.trackingserver.service.SecurityService:

### Public Member Functions

- void [autoLogin](#) (String username, String password)
- String [findLoggedInUsername](#) ()

#### 5.26.1 Member Function Documentation

##### 5.26.1.1 autoLogin()

```
void pm9.trackingserver.service.SecurityService.autoLogin (
    String username,
    String password )
```

Implemented in [pm9.trackingserver.service.impl.SecurityServiceImpl](#).

##### 5.26.1.2 findLoggedInUsername()

```
String pm9.trackingserver.service.SecurityService.findLoggedInUsername ( )
```

Implemented in [pm9.trackingserver.service.impl.SecurityServiceImpl](#).

The documentation for this interface was generated from the following file:

- `src/main/java/pm9/trackingserver/service/SecurityService.java`

## 5.27 pm9.trackingservice.service.impl.SecurityServiceImpl Class Reference

Inheritance diagram for pm9.trackingservice.service.impl.SecurityServiceImpl:

Collaboration diagram for pm9.trackingservice.service.impl.SecurityServiceImpl:

### Public Member Functions

- void [autoLogin](#) (String username, String password)
- String [findLoggedInUsername](#) ()

### Static Public Attributes

- static final Logger [logger](#) = LoggerFactory.getLogger(SecurityServiceImpl.class)

### Private Attributes

- AuthenticationManager [authenticationManager](#)
- UserDetailsService [userDetailsService](#)

### 5.27.1 Detailed Description

Implementation of [SecurityService](#).

It provide service to current methods for current logged in user.

### 5.27.2 Member Function Documentation

#### 5.27.2.1 autoLogin()

```
void pm9.trackingserver.service.impl.SecurityServiceImpl.autoLogin (
    String username,
    String password )
```

Method used to auto login user after registration.

##### Parameters

|                 |                        |
|-----------------|------------------------|
| <i>username</i> | Username for new user. |
| <i>password</i> | Password for new user. |

Implements [pm9.trackingserver.service.SecurityService](#).

#### 5.27.2.2 findLoggedInUsername()

```
String pm9.trackingserver.service.impl.SecurityServiceImpl.findLoggedInUsername ( )
```

Returns username of currently logged in user.

##### Returns

Username string.

Implements [pm9.trackingserver.service.SecurityService](#).

### 5.27.3 Member Data Documentation

#### 5.27.3.1 authenticationManager

```
AuthenticationManager pm9.trackingserver.service.impl.SecurityServiceImpl.authentication←  
Manager [private]
```

### 5.27.3.2 logger

```
final Logger pm9.trackingserver.service.impl.SecurityServiceImpl.logger = LoggerFactory.get←  
Logger(SecurityServiceImpl.class) [static]
```

### 5.27.3.3 userDetailsService

```
UserDetailsService pm9.trackingserver.service.impl.SecurityServiceImpl.userDetailsService  
[private]
```

The documentation for this class was generated from the following file:

- src/main/java/pm9/trackingserver/service/impl/SecurityServiceImpl.java

## 5.28 pm9.trackingserver.TrackingserverApplication Class Reference

Inheritance diagram for pm9.trackingserver.TrackingserverApplication:

Collaboration diagram for pm9.trackingserver.TrackingserverApplication:

### Static Public Member Functions

- static void [main](#) (String[] args)

### Protected Member Functions

- SpringApplicationBuilder [configure](#) (SpringApplicationBuilder application)

#### 5.28.1 Detailed Description

Spring boot application which is run.

This file is the starting point when the application is deployed. It extends SpringBootServletInitializer.

#### 5.28.2 Member Function Documentation

##### 5.28.2.1 [configure\(\)](#)

```
SpringApplicationBuilder pm9.trackingserver.TrackingserverApplication.configure (
    SpringApplicationBuilder application ) [protected]
```

Configures the SpringApplicationBuilder.

##### Parameters

|                    |   |
|--------------------|---|
| <i>application</i> | SpringApplicationBuilder which needs to be configured |
|--------------------|---|

##### Returns

updated SpringApplicationBuilder

##### 5.28.2.2 [main\(\)](#)

```
static void pm9.trackingserver.TrackingserverApplication.main (
    String [] args ) [static]
```

Driver function.

##### Parameters

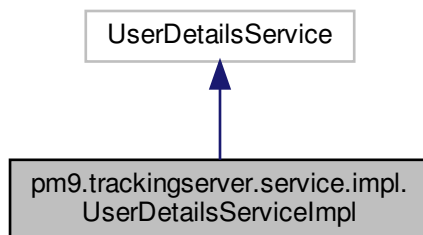

|             |                         |
|-------------|-------------------------|
| <i>args</i> | Command line arguments. |
|-------------|-------------------------|

The documentation for this class was generated from the following file:

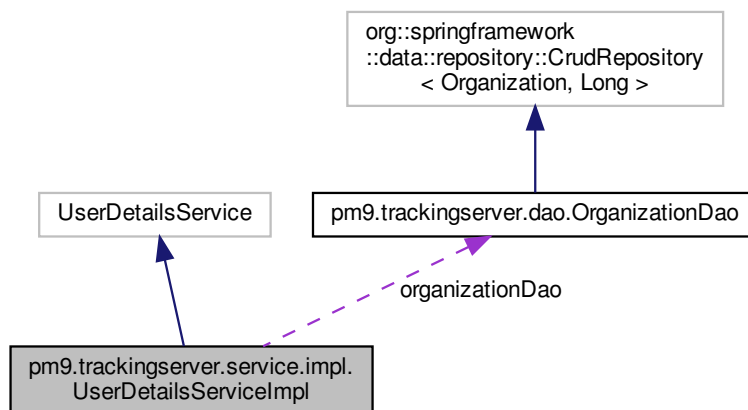

- src/main/java/pm9/trackingserver/TrackingserverApplication.java

## 5.29 pm9.trackingserver.service.impl.UserDetailsServiceImpl Class Reference

Inheritance diagram for pm9.trackingserver.service.impl.UserDetailsServiceImpl:

Collaboration diagram for pm9.trackingserver.service.impl.UserDetailsServiceImpl:

### Public Member Functions

- UserDetails [loadUserByUsername](#) (String username)

#### 5.29.1 Member Function Documentation

#### 5.29.1.1 loadUserByUsername()

```
UserDetails pm9.trackingserver.service.impl.UserDetailsServiceImpl.loadUserByUsername (
    String username )
```

Creates and returns org.springframework.security.core.userdetails.UserDetails for given username.

**Parameters**

|                 |   |
|-----------------|---|
| <i>username</i> | Identifier for user which needs to be loaded. |
|-----------------|---|

**Returns**

org.springframework.security.core.userdetails.UserDetails for a given user.

The documentation for this class was generated from the following file:

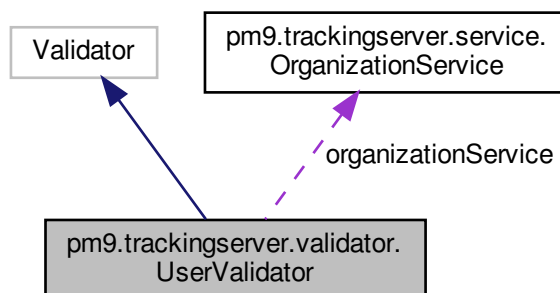

- src/main/java/pm9/trackingserver/service/impl/UserDetailsServiceImpl.java

**5.30 pm9.trackingserver.validator.UserValidator Class Reference**

Inheritance diagram for pm9.trackingserver.validator.UserValidator:

Collaboration diagram for pm9.trackingserver.validator.UserValidator:

## Public Member Functions

- boolean [supports](#) (Class<?> aClass)
- void [validate](#) (Object object, Errors errors)

## Private Attributes

- [OrganizationService](#) [organizationService](#)

### 5.30.1 Detailed Description

Used to validate user when they register.

It uses the constants defined in 'validation.properties'.

### 5.30.2 Member Function Documentation

#### 5.30.2.1 supports()

```
boolean pm9.trackingserver.validator.UserValidator.supports (
    Class<?> aClass )
```

This method specifies which class is being validated.

#### 5.30.2.2 validate()

```
void pm9.trackingserver.validator.UserValidator.validate (
    Object object,
    Errors errors )
```

Method to validate user.

#### Parameters

|               |   |
|---------------|---|
| <i>object</i> | which needs to be validated.                    |
| <i>errors</i> | Object which contains the errors in the object. |

### 5.30.3 Member Data Documentation

#### 5.30.3.1 organizationService

```
OrganizationService pm9.trackingserver.validator.UserValidator.organizationService [private]
```

The documentation for this class was generated from the following file:

- `src/main/java/pm9/trackingserver/validator/UserValidator.java`
